SUMMARY

I am a purposeful software developer with strong programming skills. Well familiar with CSS/HTML, Sass preprocessor, cross-browser and adaptive markup skills. Good at JavaScript coding, solving algorithmic tasks and developing user-friendly solutions. I am a responsible individual who continually advances skills and abilities. Very interested in studying React Native / NodeJS.
Ready for joining upon request.

Responsibilities:

- Development of the customer base;
- Ensuring the implementation of the sales volume plan;
- Conducting negotiations, product presentation;
- Conclusion of supply contracts;
- Collection of receivables;

ACHIEVEMENTS

Perhaps my greatest achievement was taking command of the vessel after it was hijacked by pirates, who captured all the officers on the bridge. I contacted the shipowners, the military, and the nearest port, and using my navigation skills, successfully brought the vessel to port.

Also I know the best spots for marlin fishing.
